

Expanding drug rehab programs and facilities is the top priority of the Rosebud Sioux Tribe in Rosebud, South Dakota

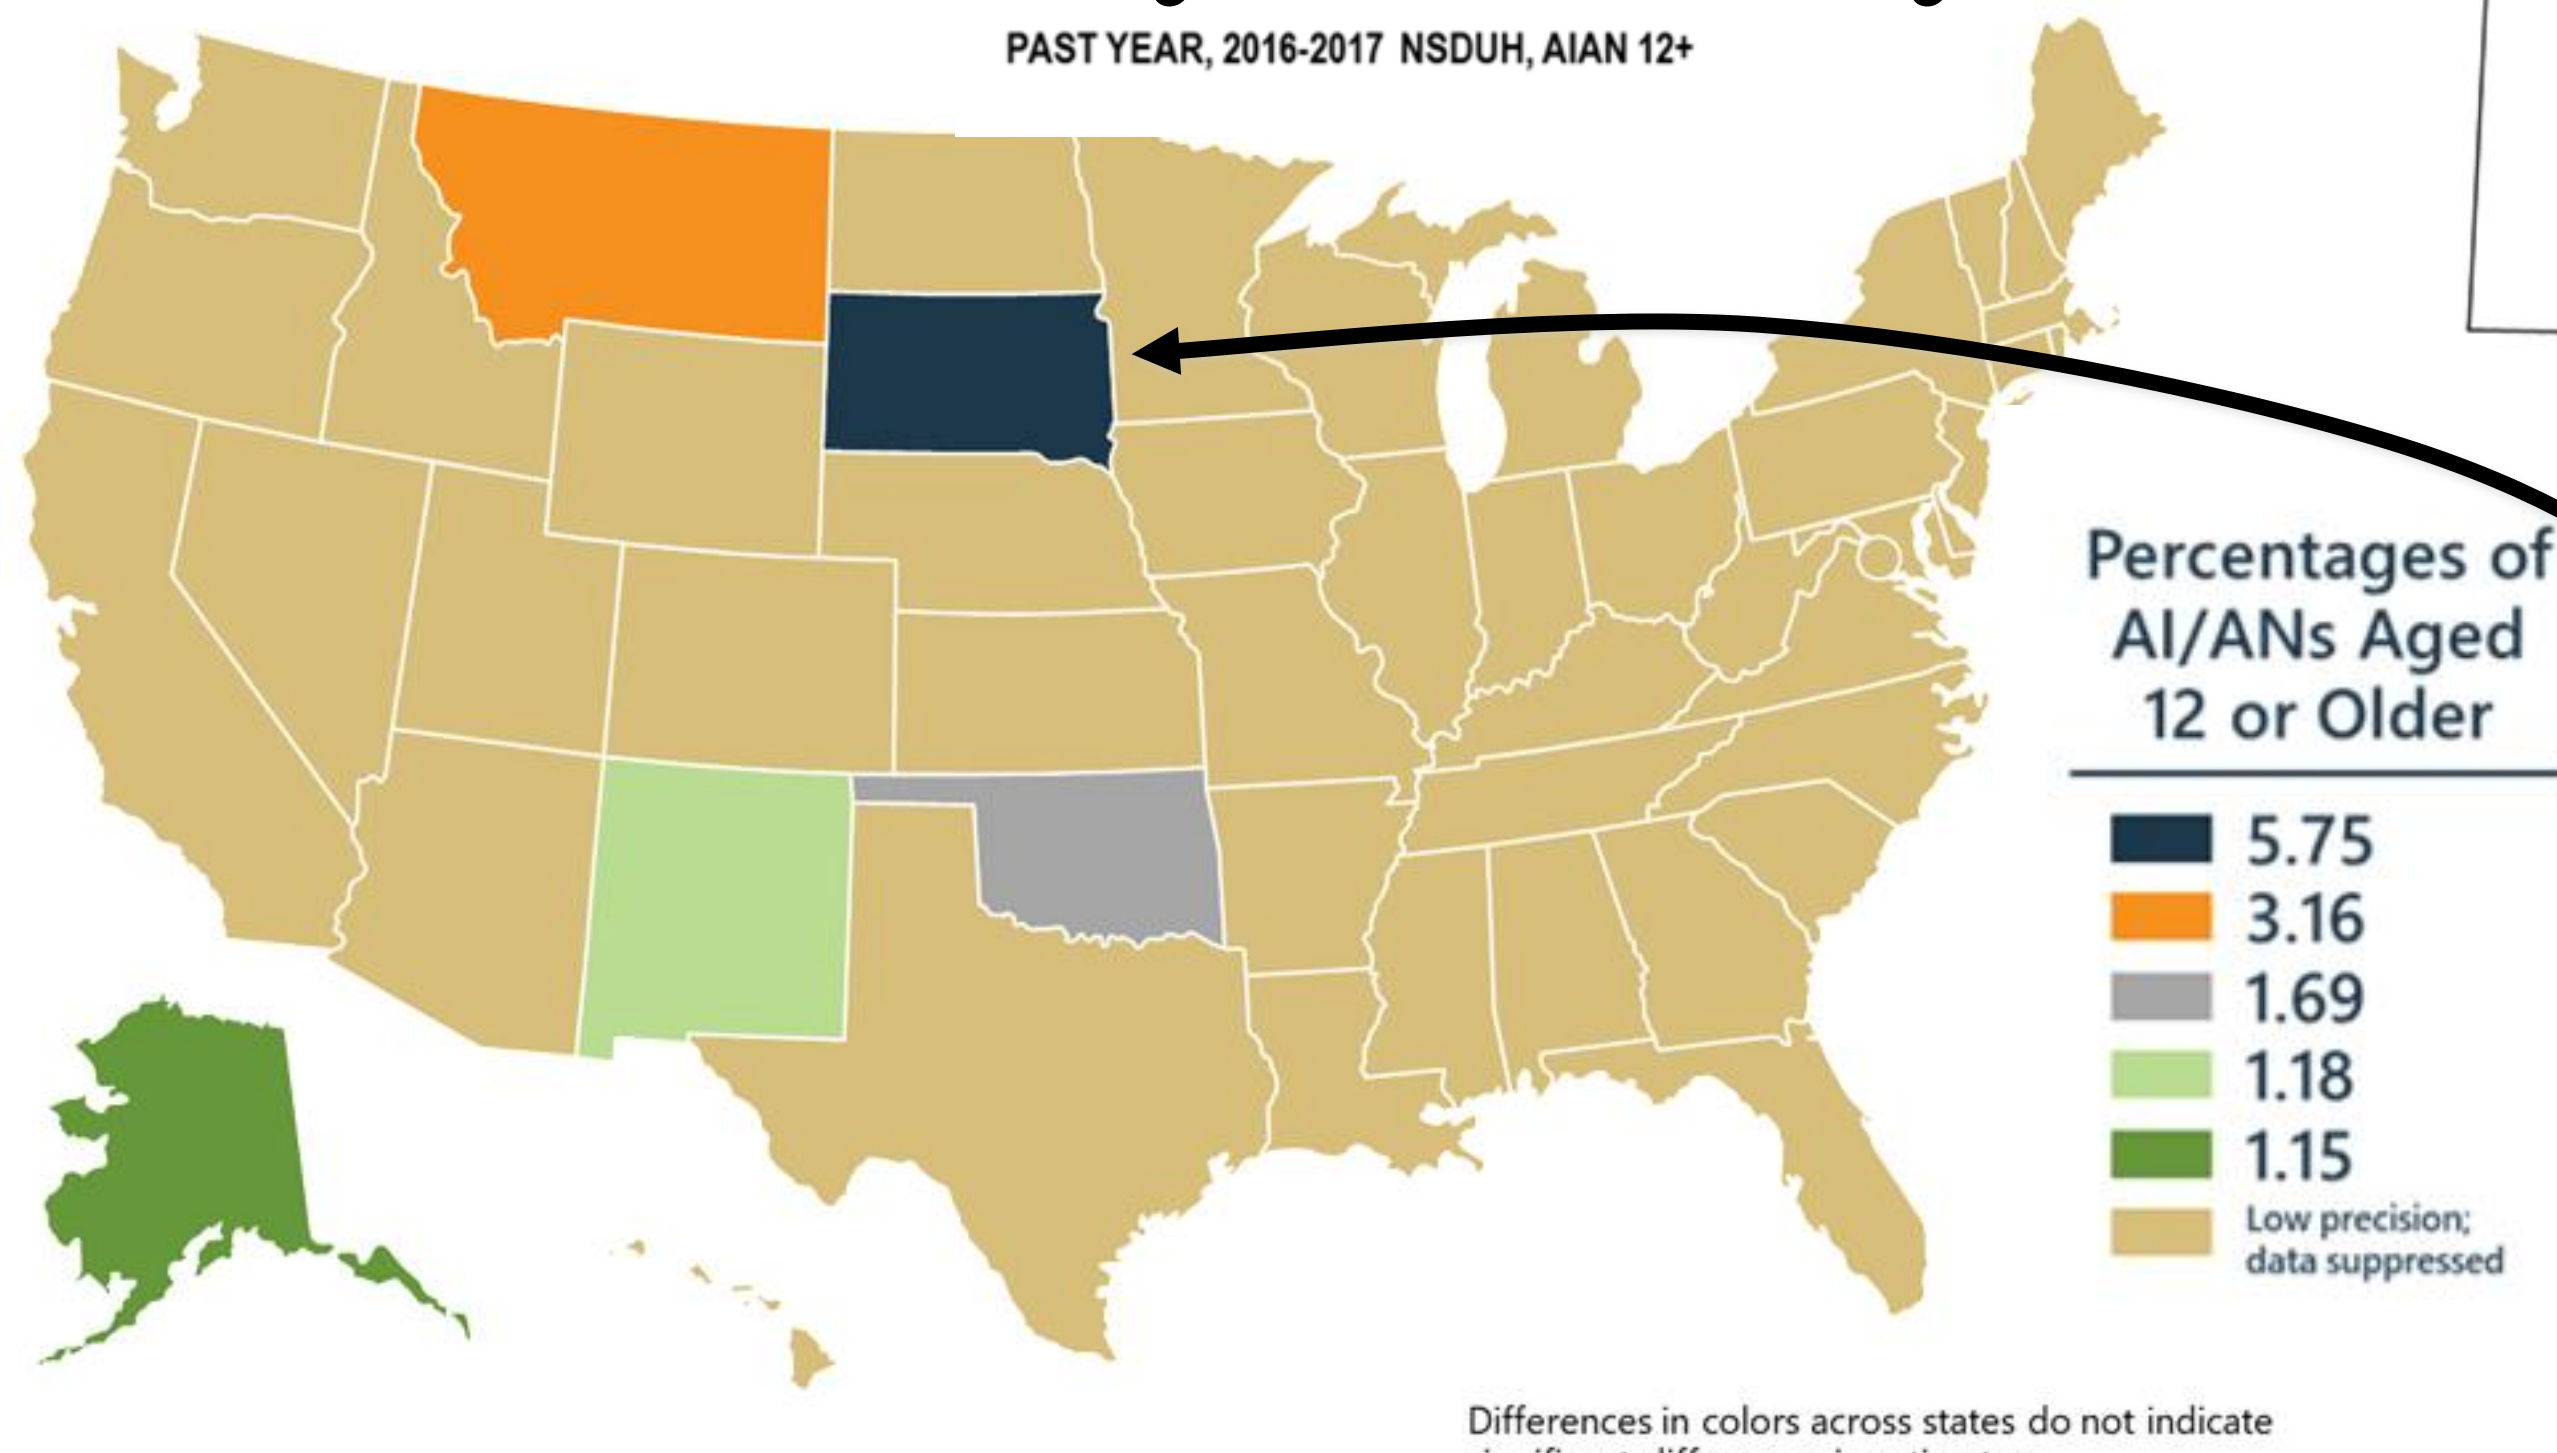

(2018 RST Needs Assessment)

WHY IS THAT?

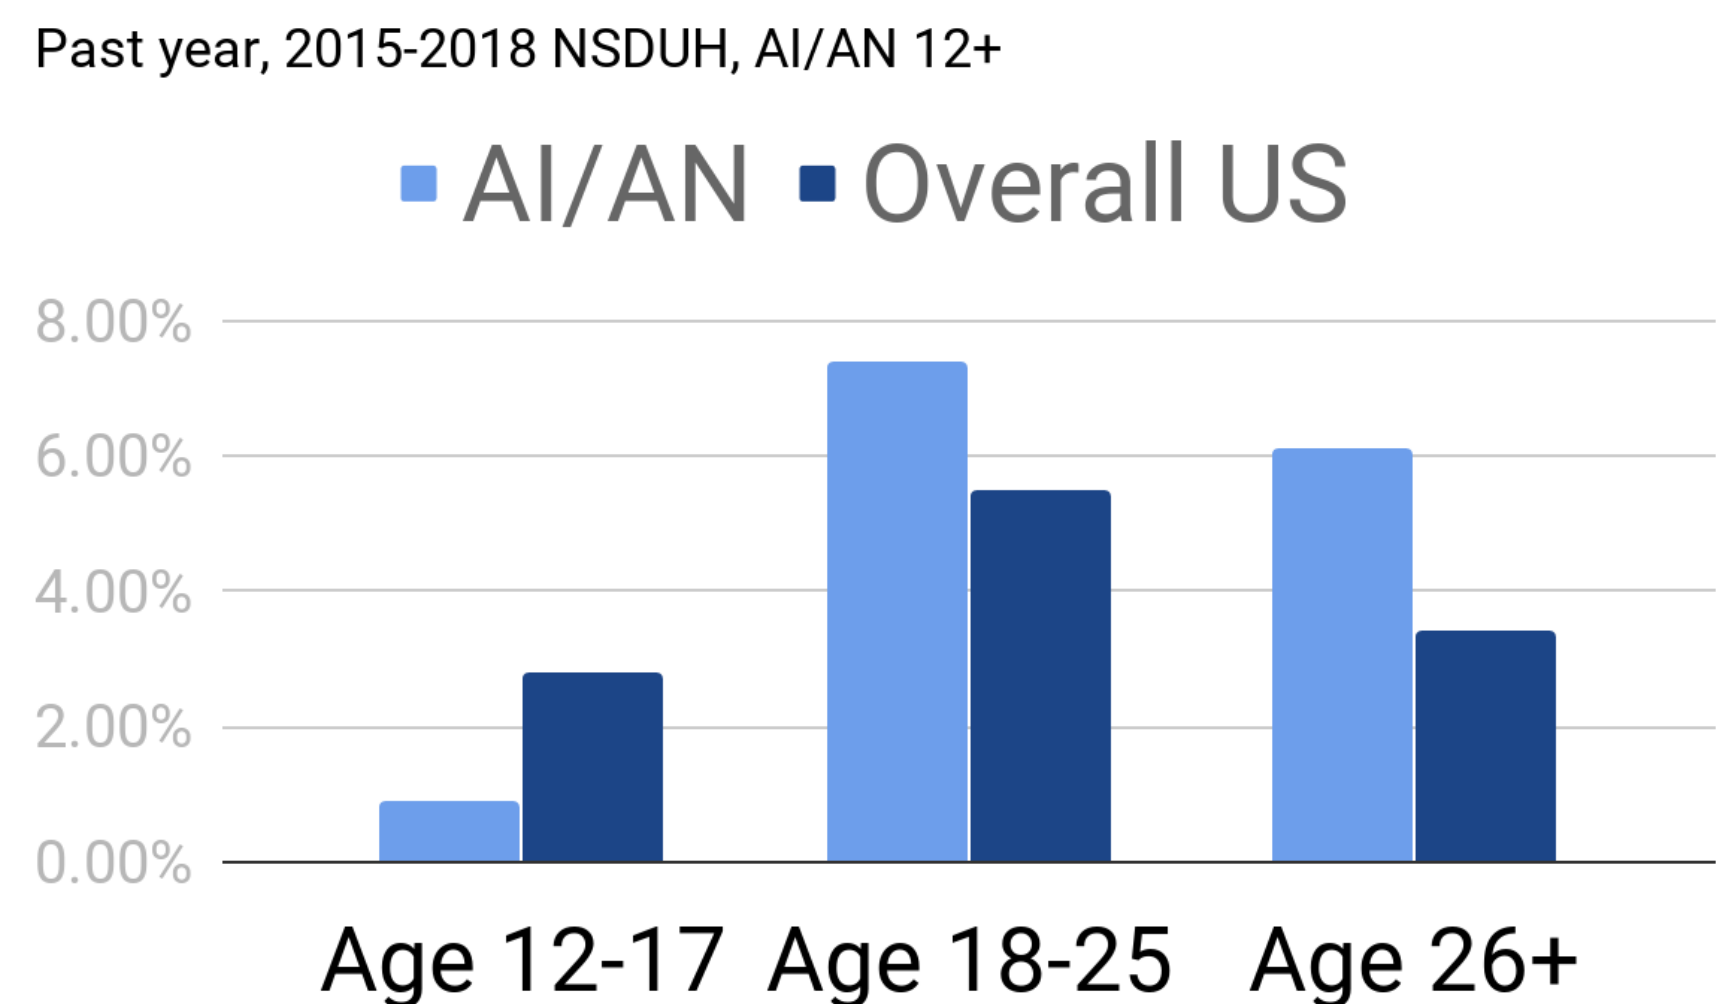

Rosebud Reservation, South Dakota: Home of the Sicangu Lakota Oyate

South Dakota has the highest percentage of methamphetamine use among American Indian / Alaska Natives in the U.S.

Rates of substance dependence or abuse among people 12 or older:

- 14.9% American Indians or Alaska Natives (AI/AN)**
- 11.3% Native Hawaiians or Other Pacific Islanders
- 10.9% Two or more races
- 8.6% Hispanics
- 8.4% Whites
- 7.4% Blacks
- 4.6% Asians

Prescription Pain Reliever Misuse among AI/AN nearly doubles that of US general population among 26 and older

In the past, Rosebud substance use disorder treatment took an **abstinence-only** approach. Now, medications for opioid use disorder are available. Better **understanding** of Rosebud community, patient and clinician **perspectives** on substance use disorders and medications for treatment of addiction will help create **locally informed best practices.**

Community based participatory research to

HOW TO DO THAT?

- 1) Get feedback from patients and clinicians engaged in treatment of opioid use disorder and methamphetamine use disorder
- 2) Hear attitudes from the community on substance use disorder and treatment options
