

Many Programs Working Independently....

Integrated Managed Care & SDOH Initiatives		Immigration & Refugee Initiative	Community Investment Fund/ Community Support Initiative	Diversity, Equity, and Inclusion Initiatives	Policy & Legislative Work
..But....	How do we connect them so they have consistency for maximum impact?	How do we identify and prioritize which programs to undertake?	What consistent measures should we apply?	How do we incorporate these into our organizational strategic plan?	How do we elevate the voices of those most impacted - members, staff, and community

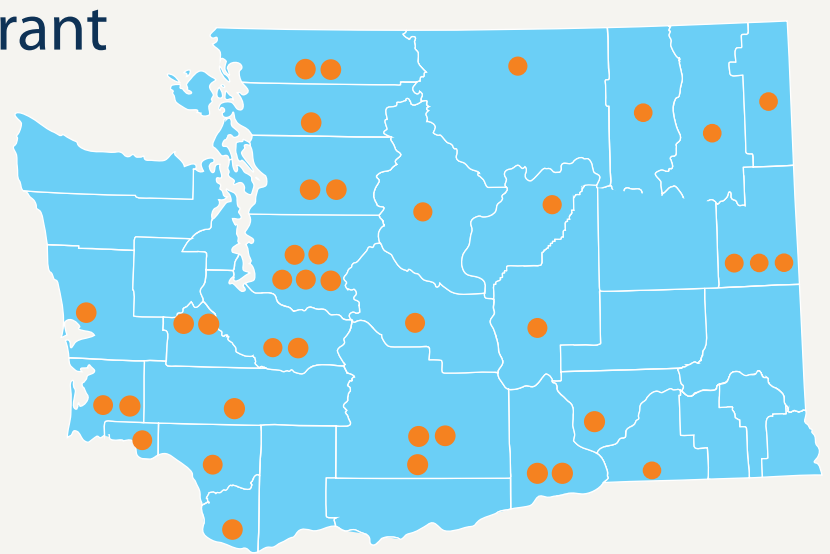

Who is CHPW?

- We are a local, Washington-based Health Plan. With nearly 30 years of experience and long-established roots in health equity for under-resourced communities.
- The health of our members is our primary concern. CHPW’s aim is to advance health equity and improve the lives of the people it serves by addressing the barriers to their whole health (medical, behavioral and social) and well-being. We work hand-in-hand with local community resources and social service organizations to support all aspects of our members’ lives.

Rooted in the Communities We Serve

Community Health Plan of Washington was founded in 1992 by a network of immigrant and federally-qualified community health centers (CHCs) in Washington State. Our parent, Community Health Network of Washington, through its 20 CHCs and 160 clinics, serves nearly one million individuals in communities across the State.
