Education

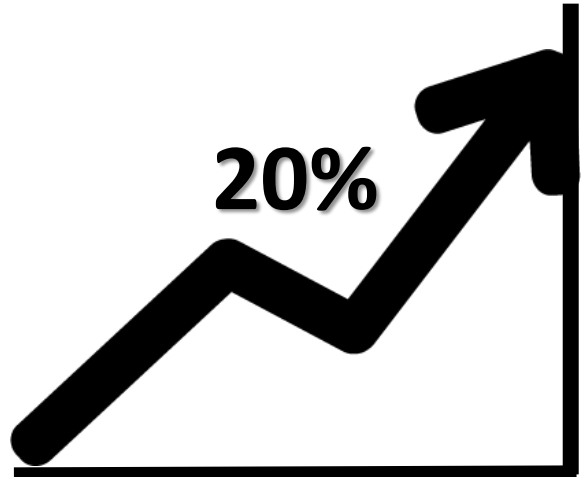

RESULTS

HTN Disparities

CRC Screenings

From 2009-2017 the Black/African-American–White disparity in hypertension (HTN) control rates decreased from a high of 5.3 percentage points to 2.2 percentage points (a 58% decrease). From 2009-2017 there was a 20% increase in the colorectal cancer screenings (CRC) in the Hispanic/Latinos demographic.
