

A Unified Approach to Advancing Health Equity

Lynn Community Health Center (LCHC) began in 1971 as a mental health clinic, serving just 500 patients. Today, as a nonprofit federally qualified health center, we support over 41,000 individuals from diverse backgrounds. Our mission is to provide comprehensive, high-quality healthcare to all, especially those facing barriers like low income, language differences, and racial disparities. With a focus on integration, we offer a wide range of services, including primary care, behavioral health, and school-based health programs, ensuring we meet the needs of our vibrant community.

Training

Cross-Departmental Collaboration

Communication

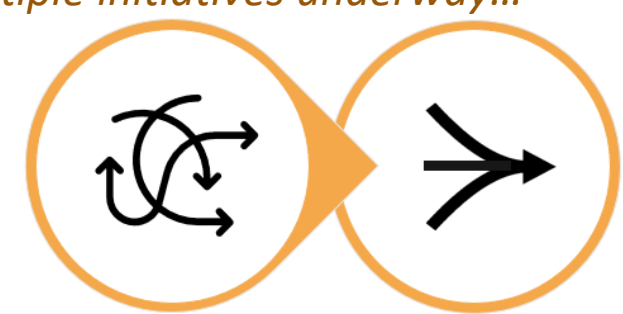

Resource Allocation

- Strategy for prioritizing initiatives that target health disparities
